

Jyothi Shankar Swarup Gummala

Senior Full Stack Engineer

+91-9182201558 | Hyderabad, India | shankargummala58@gmail.com | linkedin.com/in/shankar-swarup-gummala | github.com/ShankarSwarup

Senior Full Stack Engineer with **3+ years** designing and shipping **scalable applications** using **Node.js, TypeScript, FastAPI, React, Angular**, and **React Native**. Delivered a **billing engine** processing **1,000+ orders**, **multi-tenant RBAC platforms**, and reliable **RESTful services**. Proficient in **MongoDB performance tuning**, **AWS serverless architecture** (Lambda, SQS, S3, EventBridge), and fault-tolerant system design.

SKILLS

Languages: JavaScript, TypeScript, Python, C++

Frameworks & Libraries: Node.js, FastAPI, Express.js, Angular, React, React Native

Backend: REST APIs, JWT Authentication, OAuth2, RBAC, Async Processing, Event-Driven Architecture

Databases: MongoDB (Aggregation Pipelines, Schema Design, Indexing), Motor (async)

Cloud & DevOps: AWS (Lambda, SQS, S3, SSM, CloudWatch, EventBridge), Docker, CI/CD Pipelines, Git, GitHub Actions

Tools & Integrations: Puppeteer, EJS, Brevo (email automation), Axios, Mocha, Sinon.js

Practices: System Design, Multi-Tenant Architecture, Performance Optimization, Agile/Scrum

EXPERIENCE

Inncircles Technologies

Hyderabad, India

Senior Software Engineer | MEAN/MERN Stack & AWS

Aug 2025 – Present

- Migrated scheduled workloads to **AWS Lambda and EventBridge**, enabling an **event-driven architecture** and cutting infrastructure costs by **20%**.
- Established **CI/CD pipelines** using GitHub Actions to automate build, test, and release processes, reducing release cycle time by **40%**.
- Introduced collaboration features including **mentions, threaded replies, and file sharing**, reducing support turnaround time by **30%**.

Inncircles Technologies

Hyderabad, India

Software Engineer | MEAN/MERN Stack

Sep 2023 – Jul 2025

- Architected a **billing and invoicing system** spanning multiple pricing models, processing **1,000+ orders per month** with **99.9% transaction reliability**.
- Engineered a **multi-level quantity tracking module** adopted by **10+ project managers**, cutting allocation errors by **30%** across projects.
- Built a **project-level analytics dashboard** used by **5+ stakeholders**, reducing reporting time by **60%**.
- Hardened and maintained **100+ REST API endpoints** with validation, logging, and error handling, reducing failure rates from **4% to below 1%**.
- Implemented **async message queuing** via AWS SQS and EventBridge to decouple service dependencies, improving throughput by **35%**.
- Accelerated document generation using **Puppeteer and EJS**; integrated **Brevo** for transactional email delivery, saving **8+ hours per week**.

Inncircles Technologies

Hyderabad, India

Software Engineer Intern | MEAN/MERN Stack

Mar 2023 – Aug 2023

- Resolved **memory leaks and inefficient event handling** in a React Native application, reducing crashes by **20%**.
- Integrated **Expo Camera** into the mobile app and built a custom camera screen with zoom and pan gesture support, improving user engagement by **18%**.

PROJECTS

Medical Platform (FastAPI, MongoDB, React, JWT, AWS)

Full-Stack Personal Project

Multi-tenant **RBAC medical platform** with **6 user roles**, **22 API endpoints**, and **6 role-specific dashboards** covering prescriptions, pharmacy, lab scans, and appointments.

- Developed **async FastAPI server-side layer** powered by Motor (MongoDB) and **JWT/OAuth2 auth**, enforcing RBAC via **require_role()** across **22 secured routes**.
- Shipped a **multi-step appointment booking flow** and **EHR export**, reducing patient onboarding time by **50%**.
- Delivered a **SuperAdmin analytics dashboard** tracking metrics across **7 MongoDB collections**, giving **6 hospital admins** organisation-wide operational visibility.

Student Results Management System (Node.js, Express.js, MongoDB, React, JWT)

github.com/ShankarSwarup/StudentResults

Academic platform with **role-based access control**, supporting **500+ users**; implemented secure authentication, REST APIs, and reporting workflows.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering

Vignan's Institute of Information Technology

Aug 2019 – May 2023

GPA: 8.38/10 | Percentage: 79.8%
